

Rembrandt XP Store™

RF detection system

The Rembrandt XP Store antenna is the logical & flexible solution for the retailer who requires a basic design with reliable performance. The combination of anodized aluminum frame and Forex™ material delivers durability in a pleasing modern antenna design. The antenna can be upgraded with transparent panels which give the antenna a premium look and will prevent children from climbing into the antenna. These panels can be printed for advertising or branding.

A bidirectional people counter can be incorporated in the Rembrandt XP Store antenna; this counter is direction sensitive and users can choose which count direction is displayed.

Remote maintenance is possible in combination with the USB/Ethernet tool.

Specifications

Performance: Omni directional detection

- Up to 2.00 meter for hard tags
- Up to 1.80 meter for sticker tags

Hardware accessories:

- USB to Can bridge (standard USB and Ethernet cable included for configuration on PC or laptop)
